3. Sampath, Vikram. Savarkar: a contested legacy 1924-1966. Gurugram: Penguin, 2021. (54616)

923.254 M83 R21

Decades after his death, Vinayak Damodar Savarkar continues to uniquely influence India's political scenario. An optimistic advocate of Hindu-Muslim unity in his treatise on the 1857 War of Independence, what was it that transformed him into a proponent of 'Hindutva'? A former president of the All-India Hindu Mahasabha, Savarkar was a severe critic of the Congress's appeasement politics. After Gandhi's murder, Savarkar was charged as a co-conspirator in the assassination. While he was acquitted by the court, Savarkar is still alleged to have played a role in Gandhi's assassination, a topic that is often discussed and debated.

In this concluding volume of the Savarkar series, exploring a vast range of original archival documents from across India and outside it, in English and several Indian languages, historian Vikram Sampath brings to light the life and works of Vinayak Damodar Savarkar, one of the most contentious political thinkers and leaders of the twentieth century.

925.70953 N62 R21

"The revolutionary discovery of induced pluripotent stem cells, or iPS cells, completely changed the world, particularly in the field of medical science. This groundbreaking achievement was made by Dr. Yamanaka Shinya of Kyoto University and won him the Nobel Prize for Physiology or Medicine in 2012. The road that led him to this accomplishment, however, was not an easy one; during his early days as a training orthopedic surgeon, Yamanaka was not skilled and was called 'a hindrance' by his supervisor. He eventually changed course to become a researcher in the field of medical science and undertook postdoctoral studies in the United States, but he experienced a mild case of depression upon returning to Japan. Even when Yamanaka presented the results of his discovery of iPS cells, he could not immediately bask in the glory of his success, since many of his peers simply could not believe his achievement. In this volume, the Nobel Prize laureate talks openly about his life from his childhood days to his current daily life and discusses his views on the future of regenerative medicine. How were iPS cells developed and what can they do?

10. Sehgal, Sanjay. *Economic and financial integration in South Asia: a contemporary perspective*. London: Routledge, 2021. (Acc. No. 54614)

337.154 SHE

This book analyses the current state and potential of economic and financial integration in South Asia, which has emerged as one of the most dynamic regions of the world. It looks at how regional convergences and cooperation would reinforce ties amongst the diverse economies of South Asia in the changing global economic landscape.

Drawing on empirical research, the book looks at the degree of economic and financial integration in South Asia, which according to the World Bank includes the least integrated regions in the world, and explores the fundamental factors that drive integration amongst these countries. It offers important insights into the financial landscape of the region, as well as the dynamics of the interlinkages in the banking system, the stock markets, and the debt markets. The book examines the role of bilateral trade in augmenting regional economic ties, the opportunities for growth these will foster, and the major challenges and roadblocks for the leaders of the region. It also provides an overview of China's role in South Asia's financial integration and the interdependence of these economies for economic opportunities, macroeconomic and financial stability, jobs, sustainable growth, and inclusive development.

11. Mukhopadhyay, Kanchan, ed. Food & power: expressions of food-politics in South Asia. New Delhi: Sage Publications, 2020. (Acc. No. 54506)  
338.19 FOO

Food practices of a people is the product of multiple factors. Endogenous as well as exogenous factors influence people's opinion and preferences about food. In India and its neighbouring countries, food practices are often delimited by economic standing, religion, caste and analogous systems of social ranking of the consumers. State and market forces also influence food behaviour by exercising control over production and trade.

Food and Power: Expressions of Food-Politics in South Asia studies power relations between those who eat and those who decide (or at least try to decide) what people should eat. It raises questions pertaining to the politicization of ethnographic tradition in South Asia in relation to the intersection of religion, economy and food. This book explores how traditional food practices have undergone change owing to the influences of migration globalization and popular media to understand how ethos of the powerful affects the foodways of relatively weaker ethnic, religious, occupational and gender groups.

Japan, a country where population decline is progressing and the number of workers is decreasing. While the fiscal deficit continues to expand, rural regions are in a crisis of disappearance. Isn't the decline of the nation already inevitable? Versus such preconceptions, economics which has struggled with population issues over many years responds "No!" Innovation holds the key to economic growth, and the fact that Japan is one of the world's leading longevity societies poses an opportunity. This book sweeps away the "population decline pessimism" that has spread throughout Japan and approaches the real issues of the Japanese economy.

13. Vijaysaradhi, Nityagopal. Water conflicts in India. New Delhi: Sumit Enterprises, 2020. (Acc. No. 54511)  
333.9100954 VIJ

Water conflicts in India have now percolated to every level. They are aggravated by the relative paucity of frameworks, policies and mechanisms to govern the use of water resources. Based on the premise that understanding and documenting different types of water conflict cases in all their complexity would contribute to informed public debate and facilitate their resolution, Forum for Policy Dialogue on Water Conflicts in India, a collaborative initiative of the WWF project 'Dialogue on Water, Food and Environment', documented a number of such case studies.

One of its kind in India, this book brings together an impressive sixty-three case studies – summarized status of the conflicts, the issues involved and their current position – and gives us a glimpse into 'the million revolts' that are brewing around water. While recognizing that each conflict is a microcosm of wider conflicts, the editors have classified these cases into eight broad themes that try to capture the dominant aspect of the conflict. These are: contending water uses; dams and displacement; equity-access-allocation; micro-level conflicts; water quality; trans-boundary conflicts; privatization; sand excavation and mining.

14. Gates, Bill. How to avoid a climate disaster: the solutions we have and the breakthroughs we need. Gurugram: Penguin, 2021. (Acc. No. 54515)  
363.738747 GAT

Bill Gates has spent a decade investigating the causes and effects of climate change. With the help of experts in the fields of physics, chemistry, biology, engineering, political science, and finance, he has focused on what must be done in order to stop the planet's slide to certain environmental disaster. In this book, he not only explains why we need to work toward net-zero emissions of greenhouse gases, but also details what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. Drawing on his understanding of innovation and what it takes to get new ideas into the market, he describes the areas in which technology is already helping to reduce emissions, where and how the current technology can be made to function more effectively, where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out a concrete, practical plan for achieving the goal of zero emissions—suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers, and ourselves accountable in this crucial enterprise.

## **History**

16. Atwal, Priya. *Royals and rebels: the rise and fall of the Sikh empire*. Noida: Harper Collins, 2021. (Acc. No. 54487)  
954.552 ATW

In late-eighteenth-century India, the glory of the Mughal emperors was fading, and ambitious newcomers seized power, changing the political map forever. Enter the legendary Maharajah Ranjit Singh, whose Sikh Empire stretched throughout northwestern India into Afghanistan and Tibet. Priya Atwal shines fresh light on this long-lost kingdom, looking beyond its founding father to restore the queens and princes to the story of this empire's spectacular rise and fall. She brings to life a self-made ruling family, inventively fusing Sikh, Mughal and European ideas of power, but eventually succumbing to gendered family politics, as the Sikh Empire fell to its great rival in the new India: the British. *Royals and Rebels* is a fascinating tale of family, royalty and the fluidity of power, set in a dramatic global era when new stars rose and upstart empires clashed.

17. Vijayan, Suchitra. *Midnight's borders: a people's history of modern India*. Chennai: Westland, 2021. (Acc. No. 54486)  
954 VIJ

India is a land of borders, its peripheries nestling against seven countries. Over seven years, across 9,000 miles, Suchitra Vijayan travelled these borderlands. The more she travelled, the clearer it became to her that local history and memory bear no resemblance to the political history of the nation that claims these lands and peoples.

From the densely populated border that India shares with Bangladesh to the highly disputed one with Pakistan, the stories in this book engage with how people live, struggle, fight and survive. A man escapes the floodlights that invade his home by blocking out all light, children use a border pillar as a handy cricket stump, and a family live out their lives beside the men who orchestrated their son's death. These are stories that question our ideas of what freedom means and what it means to be a citizen. At a time when millions in India face loss of citizenship—the largest crisis of manufactured statelessness in human history—Vijayan's clear-eyed, empathetic reportage provides a re-examination of the idea of territorial sovereignty.

18. Roushan, Rahul. *Sanghi who never went to a Shakha*. New Delhi: Rupa Publications, 2021. (Acc. No. 54587)

954.053 ROU

The book is the story of this transformation. This is not an autobiography, though it could read like one in parts. It is not even a collection of intellectual essays, though it could read like one in parts. It is the retelling of some historical events and how those events impacted the journey of Rahul Roushan and countless people like him. The book looks at factors like education, media, technology and obviously, electoral politics, which played a key role in this transformation.

19. Sahay, C.D., ed. *Vimarsh: new frontiers in public debate*. New Delhi: Vivekananda International Foundation, 2020 (Acc. No. 54105)

954 VIM

There is always a purpose, an objective and a target audience behind the exercise of writing and publishing any book. Measured against these classical parameters, the book on 'Vimarsh' might appear a bit different from the normal. Yes, it is so in many ways since it is a book that seeks to present before the readers a glimpse of the evolving thinking by experts in different fields on different critical aspects of India's growth story. That story is sought to be conveyed through a carefully compiled narrative emerging out of a series of public lectures delivered by eminent personalities on a variety of issues and subjects over a span of ten years commencing 2010 that marked the founding of Vivekananda International Foundation (VIF). These lectures have been carefully converted into articles with minimal editing, ensuring that the essence of the speakers are retained in the narrative presented before the readers. The journey begins with exploration of India's civilisational past through fascinating discourses on the Saraswati River and the contemporary relevance of Swami Vivekananda.

20. Macdonald, Myra. *White as the shroud: India, Pakistan and war on the frontiers of Kashmir*. Noida: Harper Collins, 2020. (Acc. No. 54586)

954.6 MAC

Between South and Central Asia, in the high mountains and cold deserts, India, Pakistan and China have fought brutal wars over barren, uninhabited territory in a bid for control over their national peripheries, including Xinjiang and Tibet in China, and Jammu and Kashmir on the Indian subcontinent. *White as the Shroud* explores this broader story through the most surreal of such conflicts: the Siachen war, fought between India and Pakistan for control of the eponymous glacier. The tale of Siachen highlights the absurdity of seeking hard borders in such desolate mountains, as well as the brutality of high-altitude warfare-- more soldiers were killed by the weather and terrain than by the fighting. As one of the few people to have visited both sides of the glacier, Indian and Pakistani, Myra MacDonald provides a first-hand view of the battlefield and a wealth of eyewitness testimony from combatants. She sets this account in the overarching narrative of the Kashmir conflict, India's defeat by China in 1962, and the 1999 India-Pakistan Kargil war. *White as the Shroud* brings a fresh perspective to one of the most volatile corners of the world, raising questions about borders and the wars fought to defend them.

21. Hussain, Shahla. Kashmir in the aftermath of partition. New York: Cambridge University Press, 2021. (Acc. No. 54557)

954.604 HUS

Kashmir remains one of the world's most militarized areas of dispute, having been in the grips of an armed insurgency against India since the late 1980s. In existing scholarship, ideas of territoriality, state sovereignty, and national security have dominated the discourses on the Kashmir conflict. This book, in contrast, places Kashmir and Kashmiris at the center of historical debate and investigates a broad range of sources to illuminate a century of political players and social structures on both sides of divided Kashmir and in the wider Kashmiri diaspora. In the process, it broadens the contours of Kashmir's postcolonial and resistance history, complicates the meaning of Kashmiri identity, and reveals Kashmiris' myriad imaginings of freedom. It asserts that 'Kashmir' has emerged as a political imaginary in postcolonial era, a vision that grounds Kashmiris in their negotiations for rights not only in India and Pakistan, but also in global political spaces.

22. Kulkarni, Uday S. The Extraordinary epoch of Nanasaheb Peshwa. Pune: Mula Mutha Publishers, 2020. (Acc. No. 54632)

954.5025092 KUL

The mid-eighteenth century began with the Marathas as the paramount power in India, and in the next two decades, they rose in power and prestige. In the Carnatic, Bengal, Rajputana, Malwa, Bundelkhand they were supreme, and in Delhi, the Marathas ruled while the Mughal king reigned. In this period when Nanasaheb Peshwa was at the helm, the Maratha power reached its zenith. But that was not the entire story. The events of the mid-eighteenth century are pivotal, and determined the course of the next five decades. The rise of the Europeans in the south and the east added a new dimension, so that this epoch eventually emerged as the crossroad of Indian history. This book narrates that engrossing story. The book is published in hardcover, with over 40 colour pictures on art plates and 27 maps and illustrations. The 500 page book is copiously annotated with over a thousand references and has a bibliography and a glossary along with an introduction to principal characters and important genealogies.

23. Sanghera, Sathnam. Empireland: how imperialism has shaped modern Britain. London: Penguin Books, 2021. (Acc. No. 54502)

941 SAN

In his brilliantly illuminating new book Sathnam Sanghera demonstrates how so much of what we consider to be modern Britain is actually rooted in our imperial past. In prose that is, at once, both clear-eyed and full of acerbic wit, Sanghera shows how our past is everywhere: from how we live to how we think, from the foundation of the NHS to the nature of our racism, from our distrust of intellectuals in public life to the exceptionalism that imbued the campaign for Brexit and the government's early response to the Covid

crisis. And yet empire is a subject, weirdly hidden from view.

The British Empire ran for centuries and covered vast swathes of the world. It is, as Sanghera reveals, fundamental to understanding Britain. However, even among those who celebrate the empire there seems to be a desire not to look at it too closely - not to include the subject in our school history books, not to emphasize it too much in our favourite museums.

24. Agrawal, Nisha, ed. Her right to equality: from promise to power. Gurgaon: Penguin, 2021. (Acc. No. 54594)  
323.340954 HER

The sixth volume in the Rethinking India series, in collaboration with the Samruddha Bharat Foundation, looks at the reality of gender equality in the country against the promises of justice and equality made in the Constitution of India. What it finds is that even today, India remains an unequal country and that women control, at best, about 10-15 per cent of economic and political resources. While there has been progress in some areas, in many other areas there has been very little and uneven change. One of the main reasons for this slow progress is that social norms that assign particular roles and identities to men and women are 'sticky' and hard to change. In India, a highly patriarchal society, these norms give very little power to women and, consequently, they have little control or influence over decisions taken within their households, in markets or in political spaces.

25. Menon, Shivshankar. India and Asian geopolitics: the past, present. Gurgaon: Penguin, 2021. (Acc. No. 54599)  
327.54 MEN

One of India's most distinguished foreign policy thinkers addresses the many questions facing India as it seeks to find its way in the increasingly complex world of Asian geopolitics. A former Indian foreign secretary and national security adviser, Shivshankar Menon traces India's approach to the shifting regional landscape since its independence in 1947. From its leading role in the "nonaligned" movement during the cold war to its current status as a perceived counterweight to China, India often has been an after-thought for global leaders—until they realize how much they needed it.

Examining India's own policy choices throughout its history, Menon focuses in particular on India's responses to the rise of China, as well as other regional powers. Menon also looks to the future and analyzes how India's policies are likely to evolve in response to current and new challenges.

As India grows economically and gains new stature across the globe, both its domestic preoccupations and international choices become more significant. India itself will become more affected by what happens in the world around it. Menon makes a powerful geopolitical case for an India increasingly and positively engaged in Asia and the broader world in pursuit of a pluralistic, open, and inclusive world order.

27. Longyu, Yu. *China and India: dialogue of civilisations*. New Delhi: Pentagon Press, 2021. (Acc. No. 54494)

327.51054 LON

*China and India: Dialogue of Civilizations* is a highly original study expounding two millennia of literary dialogue between the two Asian giants right from the beginning of Buddhist sutra translation and its influence on various facets of Chinese literature to the modern and contemporary Indian studies in China and Chinese studies in India. The transmission of Indian fables, myths and theatre into China, dissemination of the Ramayana and Mahabharata, and adaptation of certain contents from these into Chinese and Buddhist literature is very interesting. The volume exhibits the translation and textual research of leading Indologists such as Padma Bhushan Ji Xianlin, Xu Fancheng, Jin Kemu, Huang Baosheng and Liu Anwu as well as contemporary scholars of Indian studies in China. A great Sanskrit scholar, Xu Fancheng, who remained in incognito hitherto, in fact was the first Chinese to translate the Upanishads. Tan Yunshan and P. C Bagchi's contribution towards China studies in India, and Osho fervour in China at one time opens up some new areas of enquiry. The study will certainly enable readers from both the countries and beyond to rediscover the flow of cross-cultural currents between the two civilisations.

327.5496051 MUL

In the June 2020 territorial dispute over Kalapani, India was faced with a newly assertive Nepal, and blamed the latter's deepening relations with China for the tension. But beyond the accusations and the grandstanding, there was a new reality to reckon with: the power equations in South Asia had been redrawn to make space for China.

Nepal did not turn northwards overnight, however. For one, Nepal–China ties have deep historical roots built on Buddhism, going as far back as the early first millennium. For

another, while the 2015 unofficial Indian blockade had provided momentum to the rift, the Himalayan nation had long wanted greater ties with its northern neighbour to counteract India's oppressive intimacy. With China's growing ambitions, both globally and in South Asia, Nepal now has a new primary bilateral partner—and Nepalis are forging a path towards modernity with its help, both in the remote Himalayan borderlands and in the cities.

Singapore and India established diplomatic relations in August 1965. However, their ties date as far back as the 10th century. The last half century has seen a blossoming of their relationship. The two countries' warm and substantive friendship is based upon history, economics, defense cooperation and a high degree of mutual trust. The relationship is quite unique because a significant portion of Singapore's population consists of ethnic Indians and an Indian language, Tamil, is one of Singapore's official languages. The book brings together 52 of Singapore's thought leaders. They come from different sectors of the Singapore's society. Each of them has written an essay on India's past or present or future. Each essay is short, easy to read and full of insight and humour. One of the writers is Singapore's Senior Minister, Mr Tharman Shanmugaratnam, a person who is admired both in Singapore and in India. The book includes essays on Nalanda University, Amaravati, India-Singapore Comprehensive Economic Cooperation Agreement and the Regional Comprehensive Economic Partnership. On the lighter side, the book contains two charming essays by Ambassador Karen Tan and Eirliani Abdul Rahman on their time in India. The book's foreword is written by Mr Goh Chok Tong, Singapore's second Prime Minister. It was Mr Goh who overcame prejudice and inertia and launched a new beginning in Singapore-India relations. This publication is a candid reflection of India and India-Singapore relations by Singaporeans who carry the hope that India will rise above its challenges to join the ranks of the great nations of the world. It will be of interest to Singaporeans who are interested in India and Indians who are interested in Singapore.

Why have relations between India and China, which comprise nearly forty per cent of the world's population, been troubled for over sixty years? A war in 1962 was followed by decades of uneasy peace, but in recent years A rising number of serious military confrontations has underlined their huge and growing differences. This book examines these differences in four crucial areas: their perceptions and prejudices about each other; their continuing disagreements over the border; their changing partnerships with America and Russia; and the growing power asymmetry between them, which affects all aspects of their relationship. China demands deference as a great power and the dominant country in

Asia, while India wants recognition and respect as an equal. With such a deep divide separating the two neighbours, what does the future hold? In this lucid, informative, and insightful book, a leading expert on the subject decodes the complex history of India–China relations and argues that the path ahead is a difficult one that could see more military confrontations, including violent border clashes. Crucial to the relationship will be India’s ability to reduce the enormous gap with China in economic, military, and even soft power.

*Hostility* is former Pakistan high commissioner to India Abdul Basit's memoir of his tenure in New Delhi, from 2014 to 2017. The book takes us through perhaps the most difficult era in India-Pakistan relations in recent years. While Narendra Modi's first prime-ministership began with a new hope of normalising relations between Pakistan and India, subsequent events unfortunately proved otherwise.

In his account, Abdul Basit takes us through the highs and lows of what is easily among the most difficult diplomatic postings anywhere the world. Written with honesty, lucidity, and filled with explosive nuggets about what goes on behind the scenes between India and Pakistan, *Hostility* provides a rare insight into what is possibly the most damaged bilateral relationship in the world.

32. The Japan-US alliance of hope: Asia-Pacific maritime security. Tokyo: Japan Publishing Industry Foundation for Culture, 2021. (Acc. No. 54530)

327.52073 JAP

The Japan-US alliance has continued to deepen and develop for around sixty years, responding to the security environment of the times. But today, the security order of the Asia-Pacific region is at an important turning point. China’s maritime activities are only intensifying, causing growing instability in the regional maritime security environment. As the existing order of the Asia-Pacific region is now being threatened, the Japan-US alliance is an “alliance of hope” for peace and prosperity.

In this book, the authors analyze the present conditions of the alliance and discuss its future direction from this perspective of maintaining the maritime security order in the Asia-Pacific region. Together with the diplomatic and security policies of Japan and the US, and of China, their research subjects include the policies of India, Australia, South Korea, Russia, and ASEAN, which are the main players in the oceans of the region, and they derive important hints for the future of the Japan-US alliance.

327.5496054 UPA

*Backfire in Nepal* explores how China has become the ultimate beneficiary of India's democracy-promotion agenda in Nepal. New Delhi had made a bold bet in 2005, but one that contained two mutually fortifying flaws: the abolition of the monarchy and the empowerment of the former Maoist rebels. The world's only Hindu monarch and kingdom were bound to India in a special relationship that neither country needed to define or assert. True, Indians had been put off by successive Nepalese monarchs playing New Delhi off against Beijing. In retrospect, a little more compassion for Nepal's compulsions might have put things into sharper relief. Nepalese Maoists, being communists first, were trained to denounce Indian 'expansionism' before American 'imperialism'. Experience may have impelled the senior leadership to make practical compromises. It was a leap of faith for New Delhi to trust the leadership to rein in their cadres' radicalism. More broadly, since India had also enlisted Western democracies, it needed to address their often-contradictory concerns throughout Nepal's turbulent transition. The Chinese could act purely on their national interests. India continues to misread how Beijing sees Nepal – both in terms of China's visions of the past and the future. This complicates the core trilateral challenge: ensuring that Nepal is not sucked deeper into the Sino-Indian vortex, only to be scorned for aggravating the Asian giants' rivalry.

In recent years, India has repeatedly expressed its ambitions of becoming a global power - or '*jagat guru*'. Yet, many believe that India's economic troubles at home are far more pressing and that foreign policy aspirations can wait. But is a proactive foreign policy really a 'luxury' for India, to be postponed until the economy develops; or is it, in fact, a prerequisite for economic growth in a globalized world? Why should the average Indian citizen care about foreign policy - and how can a proactive foreign policy help Indians become more prosperous? Scanning our ever-changing world from East to West, and defining India's national interests and needs, Mohamed Zeeshan passionately argues that India needs a more coherent strategy for its relations with the outside world. Through travels and debates across continents, Zeeshan lays out a vision for how India can champion the cause of global good.

Someone is also sending threatening letters to the vicarage, where the vicar, Shahpur Edalji, is a Parsi convert to Christianity and the first Indian to have a parish in England. His son George – quiet, socially awkward and the only boy at school with distinctly Indian features – grows up into a successful barrister, till he is improbably linked to and then prosecuted for the above crimes in a case that left many convinced that justice hadn't been served. When he is released early, his conviction still hangs over him. Having lost faith in the police and the legal system, George Edalji turns to the one man he believes can clear his name – the one whose novels he spent his time reading in prison, the creator of the world's greatest detective. When he writes to Arthur Conan Doyle asking him to meet, Conan Doyle agrees. New Delhi: Bloomsbury, 2021. (Acc. No. 54476)

The thinkers and philosophers of ancient India contemplated intensively and extensively about all aspects related to life, and art was one of the major domains they touched upon. A profound and intense analysis of the art experience in literature naturally led to the evolution of one of the most sophisticated and long-standing poetic systems in the world.

*An Introduction to Indian Aesthetics: History, Theory, and Theoreticians* offers a comprehensive historical and conceptual overview of all the major schools in Sanskrit poetics—one of the most sophisticated and long-standing traditions of literary criticism in the ancient world. The book, despite its primary focus on the major exponents of each school, also aims to give the reader a good idea as to how these concepts were treated before and after their major practitioners. An important part of Sanskrit poetics that often intimidates a modern reader is its seemingly difficult terminology. This book particularly addresses this issue by using contemporary idioms for readers who have no background of Sanskrit. It also aims to draw points of comparison, wherever relevant, between certain concepts in Sanskrit poetics and their western counterparts.

Exuberance and dread, attachment and estrangement: in this novel, Jhumpa Lahiri stretches her themes to the limit. In the arc of one year, an unnamed narrator in an unnamed city, in the middle of her life's journey, realizes that she's lost her way. The city she calls home acts as a companion and interlocutor: traversing the streets around her house, and in parks, piazzas, museums, stores, and coffee bars, she feels less alone.

We follow her to the pool she frequents, and to the train station that leads to her mother, who is mired in her own solitude after her husband's untimely death. Among those who appear on this woman's path are colleagues with whom she feels ill at ease, casual acquaintances, and "him," a shadow who both consoles and unsettles her. Until one day at the sea, both overwhelmed and replenished by the sun's vital heat, her perspective will abruptly change.

Now, in his latest collection of nonfiction, he brings together insightful and inspiring essays, criticism, and speeches that focus on his relationship with the written word and solidify his place as one of the most original thinkers of our time.

Gathering pieces written between 2003 and 2020, *Languages of Truth* chronicles Rushdie's intellectual engagement with a period of momentous cultural shifts. Immersing

the reader in a wide variety of subjects, he delves into the nature of storytelling as a human need, and what emerges is, in myriad ways, a love letter to literature itself. He delves deep into the nature of “truth,” revels in the vibrant malleability of language and the creative lines that can join art and life, and looks anew at migration, multiculturalism, and censorship.

Enlivened on every page by Rushdie’s signature wit and dazzling voice, *Languages of Truth* offers the author’s most piercingly analytical views yet on the evolution of literature and culture even as he takes us on an exhilarating tour of his own exuberant and fearless imagination.

Guruji B.K.S. Iyengar, credited with spreading the gospel of yoga across the world, began to practise it as a young boy. He was, in those days, constantly unwell, and his brother-in-law thought yoga would help him cope. Over time, learning from his own experiences, Guruji refined and then redefined what he was taught. A disease-free state was no longer his goal; health, he had come to believe, included well-being of the body, mind, emotions, intellect, consciousness, morality, sociality and conscience.

It was ill health that introduced Guruji to yoga, and it was with yoga that he gifted health to millions across the world. In this inspirational book are stories of people with grit and determination, who overcame various challenges—amputated limbs, cancer, emotional trauma—with the aid of Iyengar Yoga. Guruji said, ‘Yoga does not change the way a person sees things; it transforms the person who sees.’ The book is a glimpse into how yoga can transform you if you open yourself to it.

179.9 JAY

This book is an inquiry into simplicity. However, simplicity has complex connotations. It does not necessarily mean renunciation of all comforts and enjoyment. It is not a life of deprivation or enforced poverty. It is not an ascetic life. Evidently simplicity has complexity as its antonym. This book is based on the premise that modern life is complex and it triggers more attendant complexities. It is an attempt to explore the countervailing conscious strategies to resist the onslaught of complexity. Life in the twenty first century is characterized by external and internal complexity of all kinds; financial, emotional, and behavioural, all of them cumulatively stealing simplicity out of our lives. The deeper tragedy is that the ideological architecture that rules the world today is designed not to make life simpler but to perpetuate complexity. This is accomplished by releasing the powerful forces of extravagant and avoidable consumption. Global capitalism which is the dominant ideology of the day has its intricate network that allures the world to the consumerist paradise. Consumption becomes an addiction, seeking (the elusive) satisfaction and (the unattainable) contentment; It is driven by the inner longing to find meaning for life. Global capitalism has to necessarily resist and discredit simplicity. While being aware of the might of this global economic behemoth, this book tries to pose the question whether an alternative lifestyle is possible.

There is little doubt that coalition governments are here to stay. But what about ideology and vision, dignity and ethics? Will they find a place in this power-hungry world of political opportunism? The idea of 'New India' has acquired a new currency. The dominant grammar of politics dilutes the critical impulse and deters the expression of alternate politics. The interpretive possibilities have been replaced by a reactive exchange. Technology is presented as a panacea, rather than just a facilitator. Legitimacy and normative dignity for these ideas is acquired by redefining the role of the institutions and also through constitutional amendments. A major intellectual effort is required to reformulate public policy, governance systems and social relations to balance the opposite claims of market efficiency and economic growth with social equity and justice. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

57. Steytler, Nico, eds. *The value of comparative federalism: the legacy of Ronald L. Watts*. London: Routledge, 2021. (Acc. No. 54560)

This book explores new avenues of international research in comparative federal studies. It re-examines the conceptual tools and methodologies for understanding federal systems, and the role of comparative federalism in the dissemination and implementation of federal concepts. It highlights the influence of comparative federalism on constitution-making as well as constitutional reforms.

The volume provides innovative and pragmatic perspectives from both the Global North and the Global South, with case studies drawn from established federations such as India, Canada, Australia, and Austria, and emerging federal systems such as Italy and South Africa. Advocating a combined approach that integrates modern and traditional theoretical routes with practical insights and contemporary analyses, it discusses the issues of multilevel elections and federal governance; coalition governments and multiparty democracy in parliamentary federal systems, such as India; minority empowerment; gender budgeting; self-governance; multinational federalism; unitary states; the nation-state; and degenerating federalism. It also breaks new ground by looking at federalism from a gender perspective and deals with tools for measuring fiscal responsibility, and a social and cultural index.

*Political Representation in India: Ideas and Contestations, 1908–1952* maps extensive and wide-ranging debates, marked by contestations and strident demands on political representation in colonial India. Further, it explores these themes during the Constitution-framing process. These debates, previously overlooked, are significant for they helped shape the institutional structures of political representation in the form of the electoral system of Indian democracy. It assists in providing an answer to why and how independent India came to adopt its current electoral system characterised by the First-Past-The-Post (FPTP) system. It also analyses how and why the alternatives to FPTP, primarily any form of proportional representation, were rejected.

Moreover, the book simultaneously provides a rich and detailed description of how

communities, and religious, caste and ethnic categories came to be defined as their demands for political representation were conceded. It also briefly deals with the issue of delimitation of constituencies during the colonial and the immediate post-independence period.

60. Pattanaik, Devdutt. Dharma artha kama moksha: 40 insights into happiness. Noida: Harper Collins, 2021. (Acc. No. 54581) 294.51 PAT

Artha-shastra is about generating food, i.e. wealth, by creating goods and services; Kama-shastra is about indulging our hungers with this food. Dharma-shastra insists we consider the hunger of others, while Moksha-shastra is about outgrowing our hungers, in order to be detached and generous. Together, these four Hindu shastras provide a framework within which human action, its purposes and consequences, can be defined; together, they validate human existence and give it meaning.

In *Dharma Artha Kama Moksha*, Devdutt Pattanaik uses his unique understanding of mythology to provide an accessible and lucid guide to the Hindu way of thinking, with short essays that are crisp expositions of important concepts.

Nine years have passed since the ethnic conflict ended in Sri Lanka. The hope that Sri Lankan refugees would return to the island has been belied. This book highlights the dilemma faced by the Sri Lankan Tamil refugees in the context of the twists and turns in Indo-Sri Lanka relations. The global refugee phenomenon and the Indian experience, the movement of Sri Lankan refugees to different parts of the world, the rise and fall of the Tamil tigers and the competitive nature of Sinhala politics which stands in the way of ethnic reconciliation are analysed in detail. The peculiar problems faced by refugees of Indian origin are highlighted. The author makes a plea for the enactment of a national refugee law, which should combine the humanitarian concerns of the refugees and security interests of the Indian state.

*The Population Myth* reveals how the right-wing spin to population data has given rise to myths about the 'Muslim rate of growth', often used to stoke majoritarian fears of a demographic skew. The author, S.Y. Quraishi, uses facts to demolish these, and demonstrates how a planned population is in the interest of all communities.

The book delves into the Quran and the Hadith to show how Islam might have been one of the first religions in the world to actually advocate smaller families, which is why several Islamic nations today have population policies in place. This busts the other myth - that Muslims shun family planning on religious grounds.

India's Power Elite is a study of the nature of power and elitism in postcolonial India. Its point of departure is the political transition under way in twenty-first-century India, with the marginalization of the Congress Party and the staging of a cultural revolution symbolized by the rise of Hindu majoritarianism. Baru deconstructs the morphology of the Indian power elite-comprising remnants of a feudal gentry, kulaks, a metropolitan business class, the civil services and a cultural elite of opinion-makers. He also examines the role of caste, class and culture in the emergence of a 'New India'. Aimed at the socially engaged reader, this book will interest both students as well as those who wield power.

305.5680954 SHU

*The Shudras: Vision for a New Path* weaves together multiple dimensions of the predicament of India's productive castes-in the spiritual, social, political, economic, philosophical and historical spheres. It reformulates their current position as well as future pathways. It strives to provoke Shudras-including regional political party leaders-all over India to realize their unique historical role in fighting unequal caste structures. And it gives a call to resist Hindutva, in which they have no liberated, equal space with the Dwija castes. At a juncture when the Shudra castes are regionalized and the Dwijas have become 'national', the fifth volume of the Rethinking India series, in collaboration with the Samruddha Bharat Foundation, seeks to bring home the real picture of their marginalized status in all key structures of the nation. It posits that the emancipation and progress of the Shudras are vital to sustain Ambedkar's constitutional democracy and move towards socio-spiritual equality.

*Decisive Decade* seeks answers through a critical analysis and a projection of nine crucial areas that will shape India 2030. These are: democracy and politics, security, health, education, economy, demography, society, jobs and livelihoods, and technology.

India, the book asserts, is at a crossroads. The 2020s will be the decisive decade determining our long-term future. While alternative scenarios are painted, with the idea of stirring debate and dialogue, the book takes an optimistic view. It aims to create a shared national vision towards which it charts out a road-map.

Using his experience and observations, Kiran Karnik joins the dots and integrates the diverse topics into a holistic view. He takes an objective but hard-hitting view of the country, and suggests that our primary goal must be to create a happy country.

In February 2019 one of the worst terror attacks on India takes place in Pulwama in Kashmir. Forty Indian soldiers are dead. But when the NIA probes the bombing they hit one dead end after another. Who were the actual masterminds of this audacious strike? It seemed impossible to find out.

In this thrilling and deeply reported book, the award-winning author and journalist Rahul Pandita tells the story of how a team of extraordinary NIA sleuths cracks the case one jigsaw piece at a time. Against all odds, they manage to connect the dots between a seemingly routine troublemaker put in preventive detention at the time of the abrogation of Article 370, a mobile phone full of lustful messages recovered after an encounter that killed a terrorist and the Pulwama attack itself. The sinister roots of the strike, they would discover, are several decades deep and can be traced to one man – Masood Azhar – and the empire of terror he created in Kashmir.
